

Sculpting For Prosthetics- 13th & 14th May

Sculpting is at the core of making prosthetics, and one of the most creative things to do.

The best thing is that to practice, all you need is a cast to work on and something to sculpt with. You don't need to mould everything you sculpt...just sculpt something, photograph it and then reuse the materials.

This is an economical way of learning, as well as building up a portfolio of sculpts which you can review later and seek advice without cluttering up your home with dozens of delicate sculptures.

These workshops will provide you with the key skills needed to get you up and running with sculpting prosthetics.

The Sculpting For Prosthetics Workshop is a two day hands-on practical class which covers the key skills and techniques required to create shapes effectively.

Day 1 is a great basics day, introducing you to essential prosthetic sculpting techniques.

Day 2 goes into more detail, covering texture and refining techniques.

Areas covered include:

- Tools & materials.
- Design and planning appliances.
- Blocking out form.
- Refining shapes.
- Creating textures and effects.
- How to harvest textures from the real world.
- How to save and copy your sculpts.

The workshops will be run at the Guru Makeup Emporium, Fulham in London. ([Click here to see a map and more details](#))

There will be a maximum group size of 6. Both days run from 10.30am to 5pm. The workshop fees include workshop notes, use of all materials and kit and a plaster face cast form to keep, allowing you to continue to practice in your own time.

WORKSHOP FEES

Sculpting For Prosthetics Workshop - 2 day
(13th & 14th May)
£300
